

AMENDMENT TO THE SPECIFICATION

Please amend the specification by canceling the present Abstract and substituting the below contained Abstract.

ABSTRACT OF THE DISCLOSURE

An intervertebral cage of the present invention includes main body defined by an upper surface, a lower surface, and a pair of side surfaces. A withdrawal prevention portion is provided on the upper and/or the lower surfaces of the main body and asymmetrically with respect to the side surfaces in a top or bottom plan view. The withdrawal prevention portion regulates an insertion direction of the intervertebral cage.
